NEW PRODUCT

# CORE

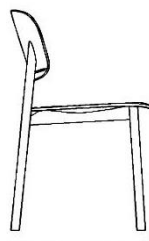

wooden chair is simple and graceful. The shape of straight board has the softness of adding curved surface. It has two forms of wooden leg and metal leg. Its structure is light and easy to install. At the same time, the appearance of its slender lines is suitable for a variety of different space environments.

wooden chair modelling originates from semi-circle,  
the back plate is a semi-circular shape,  
in order to increase its lightness, so in the back  
plate to add a flash, increase the sense of design  
and unique features, seat plate based on ergo-  
nomics principle to deal with the inward depression,  
so that users  
feel more  
comfortable.
